

HFS4(JGC-4F)

SOLID STATE RELAY

File No.: E133481

File No.: R2024431

File No.: CQC02001001946

Features

- DC input-AC output for 2A load at 25°C
- Photo isolation
- Built-in snubber
- Zero cross or random turn-on
- Printed circuit board mount
- RoHS compliant

INPUT (TA = 25°C)

Control voltage range	05D	4 to 6VDC
	12D	9.6 to 14.4VDC
	24D	19.2 to 28.8VDC
Must operate voltage	05D	Max. 4VDC
	12D	Max. 9.6VDC
	24D	Max. 19.2VDC
Must release voltage		Min. 1.0VDC
Typical input current		10mA

OUTPUT

Load voltage range (at 47 to 63Hz)	75 to 264VAC	
Load current range	0.1 to 2A	
Max. surge current (10ms)	25Apk	
Max. leakage current	1.5mA	
Max. on-state voltage drop	1.5VAC	
Max. turn-on time	Zero cross turn-on	10ms
	Random turn-on	1ms
Max. turn-off time	10ms	
Max. transient overvoltage	600Vpk	
Min. off-state dv/dt	100V/μs	
Max. zero-crossover voltage	±15V	
Min. power factor	0.5	

GENERAL

Dielectric strength (input to output)	2000VAC, 50/60Hz, 1min.	
Insulation resistance	1000MΩ (at 500VDC)	
Max. capacitance (input to output)	5pF	
Vibration durability	10 to 55HZ 1.5mm DA	
Shock durability	1000m/s ²	
Ambient temperature	Operating	-30°C to +80°C
	Storage	-30°C to +100°C
Ambient Humidity	45 to 85% RH	
Unit weight	Typ. 6g	

DESCRIPTION

This SPST-NO printed circuit board mount SIP SSR provides AC output switching in a high density package. The HFS4's DC input is compatible with 5, 12 and 24V logic systems. All models include an internal snubber. The relays provide 2000V opto-isolation, between input and output. Encapsulation, thermally conductive epoxy.

PRECAUTIONS

1. Soldering must be completed within 10 seconds at 260 °C or less or within 5 seconds at 350 °C or less.
2. The SSR case serves to dissipate heat. Install the relays so that they are adequately ventilated. If poor ventilation is unavoidable, reduce the load current by half.
3. The input circuitry does not incorporate a circuit protecting the SSR from being damaged due to a reversed connection.
4. Make sure that the polarity is correct when connecting the input lines.
5. When using the HFS4 series for an AC load with a peak voltage of more than 450V, connect the load terminals of the relay to an inrush absorber (varistor). The recommended varistor voltage, 440 to 470V.
6. The load terminals are internally connected to a snubber circuit that absorb noise. However, if wiring from these terminals is laid with or placed in the same duct as high-voltage or power lines, noise may be induced, causing the SSR to operate irregularly or malfunction.
7. When using the HFS4 series in phase control applications, at a phase control angle close to 180 degrees the relay's input signal turn off at the trailing edge of the AC sine wave must be limited to end 200μs before AC zero cross. This assures that the relay has time to switch off. Shorter times may cause loss of control at the following half cycle.
8. Terminal arrangement

HONGFA RELAY

ISO9001、ISO/TS16949、ISO14001、OHSAS18001 CERTIFIED

2006 Rev. 2.00

ORDERING INFORMATION

Type		HFS4 /		12	D	1	T	XXX
Input voltage	05: 4 to 6V	12: 9.6 to 14.4V	24: 19.2 to 28.8V					
Input voltage form	D: DC							
Zero cross function	0: Zero cross turn-on		1: Random turn-on					
Termination	T: T type M: M type (See the following)							
Special request code	(Only for special requirements, e.g. 555 stand for RoHS compliant)							

Notes: HFS4 is an environmental friendly product, please mark special code (555) when order.

CHARACTERISTIC CURVE

Max. Load Current
vs. Ambient Temperature

Max. Permissible Non-repetitive
Peak Surge Current vs. Continuance Time

Disclaimer

This datasheet is for the customers' reference. All the specifications are subject to change without notice.

We could not evaluate all the performance and all the parameters for every possible application. Thus the user should be in a right position to choose the suitable product for their own application. If there is any query, please contact Hongfa for the technical service. However, it is the user's responsibility to determine which product should be used only.
